

University of Veterinary Medicine and Pharmacy in Košice

Descriptions of the field of habilitation proceeding
Descriptions of the field of the proceedings for the appointment of
professors

Food Hygiene

Basic legal frameworks arising from the Standards for Habilitation Proceeding and Proceedings for the Appointment of Professors of the Slovak Accreditation Agency for Higher Education

1. The institution has a field of habilitation proceedings and inauguration proceedings defined by its name and content. The institution guarantees that the content is as close as possible to the field of study or both fields of study to which it is assigned.
2. The institution is entitled to design, deliver and modify third-level study programmes in the field of study to which the field of habilitation proceedings and inauguration proceedings is assigned.
3. If the field of habilitation proceedings and inauguration proceedings is assigned to two fields of study, the institution has the above-mentioned rights in both fields of study.
4. The institution employs at least five designated persons for fixed weekly working hours who are responsible for the development and quality assurance of the field of habilitation proceedings and inauguration proceedings. These persons are involved in scientific or artistic activities of the institution within the field of habilitation proceedings and inauguration proceedings, or in a related field. Of these persons, at least two are in the position of professor with the title “professor”, and the others are at least in the position of associate professor with the title “associate professor”. Each of these persons may be responsible for the development and quality assurance of at most one field of habilitation proceedings and inauguration proceedings at only one higher education institution in the Slovak Republic
5. The institution carries out long-term and continuous research, artistic and other activities in the field of habilitation proceedings and inauguration proceedings, the intensity and extent of which corresponds to the nature of these proceedings and whose results are on an internationally significant level.
6. The institution demonstrates the existence of a critical mass for research and art and a high level of quality in research, artistic and other activities by its right to design, deliver and modify third-level programmes in at least half of the fields of study in which the institution provides higher education.

Description of the field of the habilitation proceedings

Food Hygiene

1. Definition of the field of the proceedings:

Name of the university: University of Veterinary Medicine and Pharmacy in Košice

Field of habilitation proceedings - Food Hygiene

Content definition - The study field of Veterinary Medicine deals with the prevention, diagnosis and treatment of diseases, disorders and injuries in animals. It covers all animal species and also protects human health by monitoring and controlling zoonotic diseases; it also deals with food safety, contributing to the creation of conditions for animal welfare and to protect the environment. The core topics of the study field include veterinary biochemistry, veterinary morphology and animal physiology, veterinary ethology and ethics, animal nutrition and dietetics, animal hygiene and environmental protection, epizootiology, veterinary toxicology, preventive veterinary medicine, diagnosis and treatment of animal diseases, internal animal diseases, veterinary surgery, orthopaedics and radiology, veterinary obstetrics and gynaecology, infectious and parasitic diseases of animals, forensic and public veterinary medicine and food hygiene. Other topics in the core knowledge of the field of study include knowledge of breeds of farm, companion and wild animals and exotic animals, health safety and quality of food and feed, plant and animal food production technologies, official food control, veterinary aspects of animal training and treatment, theoretical and practical aspects of animal welfare and protection, use of animals for animal therapy.

In the field of habilitation and inauguration proceedings Food Hygiene, current issues in the field of food, technology and food safety are studied in detail, analysed and scientifically solved at the top international level. Within the doctoral study programme in food hygiene, experts with a high degree of prerequisite for subsequent scientific work in the field of habilitation and inauguration and for achieving results of scientific work publishable in top international journals are educated. After completing the 3rd level of higher education, they are able to exercise the profession of a veterinarian specialist for hygiene, quality and health safety of produced foodstuffs. They are proficient in scientific methods of research and development, with a focus on research in the field of hygiene and quality of food of animal and plant origin, development of food technology, laboratory diagnostic methods, development of food legislation, etc. They are able to formulate new hypotheses, judgements and strategies for further development of the scientific field, evaluate theories, concepts and innovations, apply

their own findings resulting from theoretical analysis and their own scientific research of a complex and interdisciplinary nature, design, verify and implement new research and working procedures.
